

# EasySeed<sup>™</sup>

## Certificate of Analysis

Batch Number: B 783

### **Certified Reference Material Data**

This certificate is designed in accordance with ISO Guide 31:2015

#### General

| Safety:               | This product is non-hazardous. |
|-----------------------|--------------------------------|
| Storage:              | 2-8°C. Do not freeze.          |
| Catalogue Number:     | ESCG100, ESCG100-5             |
| Production Date:      | 21 June 2023                   |
| Expiration Date:      | 1 November 2023                |
| Volume:               | 1.292 ml +/- 44 ul             |
| Suspension media:     | Buffered saline solution       |
| Sterilisation method: | Gamma Irradiation.             |

| Counts<br>(Method Ref: CG014) | Mean (i) | St.Dev.(ii) | Expanded<br>Uncertainty(iii) |
|-------------------------------|----------|-------------|------------------------------|
| Cryptosporidium count         | 99       | 1.6         | 4.4                          |
| Giardia count                 | 100      | 1.6         | 4.9                          |
| DAPI staining:                |          |             |                              |
| Cryptosporidium % +ve         | 100      | %           |                              |
| Giardia % +ve                 | 100      | %           |                              |

The Mean CFU quantification (i) and associated SD (ii) are traceable to counts using flow cytometry

#### Stock specifics\*

| Organism:            | Cryptosporidium parvum  |
|----------------------|---|
| Strain:              | Iowa  |
| Source:              | Bovine  |
| Shed date:           | 07 June 2023  |
| Purification method: | Discontinuous sucrose and cesium chloride centrifugation gradients. |

#### Stock specifics\*

| Organism:            | Giardia lamblia                                     |
|----------------------|---|
| Strain:              | H3  |
| Source:              | Gerbil  |
| Shed date:           | 02 June 2023  |
| Purification method: | Sucrose and Percoll density gradient centrifugation |

#### **Certified Values and Uncertainties**

#### Enumeration Method

#### A) CG-014

The count values have been obtained by taking a randomised significant sample of each batch and enumerating cysts and oocysts by flow cytometric analysis.

B) Stability Ref: Exp #1421

Stability testing has been conducted on batch ESCG100-32 of EasySeed™ at 4 months and 12 days. EasySeed™ with an assigned property value in terms of its known count value is used as a quality control reference material. This CRM has been produced by flow cytometry and is traceable to natural numbers.

 i) The certified value represents the unweighted mean counts from a statistically relevant number of samples covering the entire product batch. The characterization uncertainty μ (characterization) represents the dispersion of measurement values, calculated as standard deviation.
ii) The Standard Deviation is a measure of variability within the batch.
iii)Combined standard uncertainty, μ(CRM), is calculated as the square root of the sum of squares of the individual contributions

(characterization, homogeneity, stability), according to:  $\mu(CRM) = \sqrt{\mu_{char}^2 + \mu_{homogeneity}^2 + \mu_{stability}^2}$ 

The Expanded Uncertainty, U(CRM) is reported at the 95% Confidence Level with a coverage factor k = 2: U(CRM) =  $\mu$ (CRM) \* k.

\* Organism identification is not certified.

Accredited for compliance with ISO 17034 Accredited Reference Material Producer

NATA is a signatory to the ILAC Mutual Recognition Arrangement for the mutual recognition of the equivalence of reference materials certificates

Accreditation No: 20685 Site No: 24813 lssue: 5 Date: 30/9/2021 Page 1 of 2

Storage and Handling: Store EasySeed<sup>™</sup> at 2-8°C.

Description:

EasySeed<sup>™</sup> contains non viable precise known counts of *Cryptosporidium and Giardia*.

Intended Use:

EasySeed<sup>™</sup> is a biological certified reference material containing a precise number of non-viable *Cryptosporidium* and *Giardia*. It is designed for use as a quantitative quality control sample.

Instructions for Use: (refer to the corresponding Product Insert for more details)

#### Seeding the sample (use one tube of EasySeed<sup>™</sup>)

- 1. Remove and keep the tube cap.
- 2. Add 2mL of 0.05% (v/v) Tween 20 to the tube.
- 3. Replace cap and vortex for 20 seconds.
- 4. Remove and keep cap and pour tube contents into sample.
- 5. Add 3mL of reagent grade water to the empty tube.
- 6. Replace cap and vortex for 20 seconds.
- 7. Remove and keep cap and pour tube contents into sample.
- 8. Repeat steps 5, 6 and 7 once more.

#### Sample Analysis

- 9. Analyze the sample as per the laboratory Standard Operating Procedure.
- 10. Record the number of fluorescent *Cryptosporidium* and *Giardia* detected.
- 11. Calculate the *Cryptosporidium* and *Giardia* recovery using the following formulae:

Cryptosporidium Recovery (%) = <u>Cryptosporidium detected x 100</u> number of Cryptosporidium in EasySeed<sup>™</sup> as per Certificate of Analysis

Giardia Recovery (%) = <u>Giardia detected x 100</u> number of Giardia in EasySeed™ as per Certificate of Analysis

#### Safety information:

EasySeed<sup>™</sup> is not classed as a Dangerous Good or hazardous material. It has been gamma irradiated and the *Cryptospordium and Giardia* are non viable.

Please refer to the Safety Data Sheet (available online www.biopoint.com.au)
